**SECTION VIII – FIRST AID MEASURES / PREMIERS SOINS**

---

**SKIN CONTACTED:** Thoroughly wash exposed area with soap and water remove contaminated clothing. Launder contaminated clothing before re use.

**EYES CONTACTED:** Flush with large amounts of water, lifting upper and lower lids occasionally. Get medical attention if irritation persists.

**SWALLOWED:** Do not induce vomiting, keep person warm, quiet and get medical attention. Aspiration of material into the lungs due to vomiting can cause chemical pneumonitis, which can be fatal.

**BREATHED:** If affected, remove individual to fresh air. If breathing is difficult, administer oxygen. If breathing has stopped, give artificial respiration and get medical attention.

---

Never use welding or cutting torch on or near drum (even empty) because product (even just residue) can ignite explosively. All five-gallon pails and larger metal containers including tank cars and tank trucks should be grounded when material is transferred. Containers of this product may be hazardous when emptied. Since emptied containers retain product residues (vapours, liquid, and/or solids), all hazard precautions given in the data sheet must be observed.

**WHMIS CLASSIFICATION:** CLASS B, DIV. 3
