

GERM-DESTROYER 15

GENERAL: GERM-DESTROYER 15 is a Quat-type disinfectant that kills a wide range of gram-positive and gram-negative bacteria and fungi at a dilution ratio of 1:33. This biodegradable product cleans, deodorizes and disinfects in one operation. GERM-DESTROYER 15 is a combination of detergents and germicide, thus eliminating the need for two separate products.

COMPOSITION:

- n-alkyl(50% C14, 40% C12, 10% C16)
Dimethyl Benzyl Ammonium Chloride.
- Surfactants
- Sodium silicates
- Sodium Carbonate
- Sequestering Agents
- Dye
- Water

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES:

- % ACTIVE INGREDIENTS: 6.5 ± 0.4
- QUATERNARY AMMONIUM CHLORIDE: 1.5 %
minimum
- PH: 10.5-11.5
- DENSITY: 1.01-1.015 gm/cm³ at 25°C
- APPEARANCE: Clear green liquid pine odour
- SOLUBILITY: Soluble in water in all proportions
- STABILITY: Stable 18 months, minimum at 21°C, 3
months at 48°C
- DIN No: 02279037
